## STEVE'S TRIM T<sup>10</sup>'S

Hey folks, I received my Bryston Trim T10...

I was a little apprehensive about the size of my room and, OMG, was I wrong! It really is perfect.

The benefit of better sound wave distribution is obvious. In particular, the bass is really impressive at high and low volumes. The peaks and dip in different parts of the room are less noticeable. And in a bass-heavy passage, the mids and highs are clear and stand out from the rest in a superb way. I'm still experimenting with angles and positioning, but I'm going to start by getting my ears used to them.

**These speakers are just awesome!**
