BRVSTON

MEMO

SEPTEMBER 2024

Good morning James,

The Bryston Bi-200 integrated amp arrived late yesterday.

Plugged in and playing! I cannot begin to tell you how large the grin is on my face. This has replaced a very capable 50-watt per side amp.

The difference in terms of driving my speakers is staggering, especially at lower volume. It's like the house has come to life for the very first time!

I have been covering the industry for 25 years and this is the first amp that has generated such an **immediate emotional experience** in me!

Thank you

Best regards,
John Thomson,
