## CUSTOMER REVIEW

MARCH 2025

A note about first weeks of listening to **Bryston BP-19 preamplifier**.

My audio system is now:

- Bryston BP-19 preamplifier.
- Bryston BCD-3 CD player.
- Bryston 4B-3 amplifier.
- Chord Qutest DAC.
- Roon Nucleus One with Qobuz music streaming service.
- Revel Performa3 F-208 speakers.
- REL S/510 subwoofer.

The BP-19 replaced a 2012 Classe Audio CP-800 preamp (I am not a fan of DSP for music listening).

**I did not expect - BUT was so pleased - to hear the improvement in listening clarity and definition that the BP-19 added to my system.**

So, my thanks to Bryston for the quality of your products - **a pleasure to listen.**

Bruce Schwartz
