MONTREAL 2025 BRYSTON

APRIL 2025

**HiFi PiG
MAGAZINE**

BRYSTON a strong Canadian classic brand that does everything. (except cables, I believe)

This year on display, on either side of a proudly flown Canadian Flag, were the Middle T10 Towers, powered by 7B³ Mono Power Amps and the BP19 as PreAmp.

With James Tanner himself sitting to my right, the system so effortlessly performed all the classic tracks, from 'Tin Pan Ally' to 'Thanks To You'.

Around the room were all variety of other models of speaker and amplifiers. Axiom Audio (Now a full fledged partner and co-habitant with Bryston) had the new Performance series M80 on display that will feature a vinyl wrap and a few other chances to bring a reduced price category for music fans.

There were also examples of the 3 way module designed crossover plates for Tri-amplifying the T10 towers. This is a really nice direction as customers can start with a base tower and amp then choose to pursue other amp alignments for tweeter, mids and woofers for an uncompromising top quality sound.

From the warmth of the interactions with reps in the room and wonderful musical sounds, all I can say is **"Oh Canada"**.
